

1=>tell me about yourself

"Good morning, [Interviewer's Name]. My name is Shubh Baranwal , i am from ayodhya uttar pardesh and I am currently pursuing BCA from UPRTOU Allahabad.

I am currently in my third year of BCA at UPRTOU, Allahabad.

In terms of technical knowledge, I have a solid foundation in HTML, CSS, JavaScript, Bootstrap, and ReactJS.

Throughout my academic journey, I've successfully completed five projects, including an eCommerce website, a Facebook clone, a music website, and a bank management system

"I'm proud to mention that I won a web design hackathon at NIELIT Haridwar. The challenge was to create a job listing page using HTML, CSS, and JavaScript and BootStrap, and it was a great experience showcasing my skills in website designing."

"i am very Excited about the opportunity, I look forward to adding value to [Company Name] with my blend of skills and a passion for continuous improvement."

2=>

What motivated you to pursue a career in front-end development?

"During my acadamic studies, I discovered the joy of turning ideas into real websites. I enjoy the creative side of front-end development, using HTML, CSS, and JavaScript to bring designs to life. Now, I'm excited to bring this passion to [Company Name] and contribute to their projects.

3=>How would you describe your proficiency in HTML, CSS, and JavaScript?

"As a front-end developer, I have a good grasp of HTML, CSS, and JavaScript. I've utilized these languages in practical projects during my studies, such as building an eCommerce site, a Facebook clone, and a music website. While I'm at the beginning of my career, I am eager to further develop my skills in these areas and apply them effectively to contribute to the exciting projects at [Company Name]."

4=>why you choose I.T. fields

"I chose the IT field because I've always been fascinated by technology and its ability to solve real-world problems. The dynamic nature of IT, the constant opportunities for learning, and the chance to contribute to innovation are what excite me the most."

5How do you handle tight deadlines and high-pressure situations?

"I handle in high-pressure situations by staying organized, prioritizing tasks, and maintaining open communication with the team."

"In the web design hackathon, we often had tight deadlines. This taught me to stay calm, focused, and adaptable."

6What steps do you take to ensure the accessibility and usability of your front-end designs for diverse users?

"I focus on making my website designs accessible to everyone. I use standard practices, proper HTML structure, and regularly test how easy it is for different people to use. My main goal is to create websites that everyone can use and have a good experience, no matter their abilities."
